SUMMARY

A full-stack web developer with strong experience building scalable, modern web applications across freelance, startup, and mid-sized company environments. Skilled in JavaScript/TypeScript ecosystems with a focus on React, Next.js, and Node.js, and experienced in designing robust backend systems, RESTful APIs, and database architectures. Proven ability to rebuild and optimize complex legacy systems, develop real-time features such as messaging, notifications, and socket-based communication, and improve performance under high-traffic conditions. Adept at collaborating with cross-functional teams to deliver production-ready features with strong attention to UI/UX, performance, and reliability. Actively leverages modern AI tools to enhance development speed, code quality, and problem-solving efficiency while maintaining clean and maintainable engineering practices.

SKILLS

- Frontend: Javascript/ Typescript, React/ Next.js, Redux, RTK Query, Zustand, Tailwind, MUI.
- Backend: PHP, Laravel, Node.js/ Express, API Design, Authentication (JWT, Oauth).
- Databases: MySQL, MongoDB.
- DevOps/ Tools: Docker, git, Linux server management.

EXPERIENCE

Evolvex Technology, Dubai - *Senior Frontend Developer*

APRIL 2025 - PRESENT

- Developed a complex admin dashboard with advanced multi-step forms, deep backend integrations, and internal business workflows.
- Implemented secure authentication features including Passkeys and Authenticator app (2FA) for enhanced login security.
- Built offline-first form draft persistence using IndexedDB, allowing users to save and resume large form inputs seamlessly.
- Developed and optimized advanced search and filtering systems for navigating large-scale dashboard datasets efficiently.
- Designed analytics and reporting interfaces with dynamic, data-heavy charts and interactive visualizations.
- Worked extensively with React, Redux, RTK Query, Formik, and Yup to manage complex state, data fetching, and form validation logic.
- Contributed to a consumer-facing web platform focused on pixel-perfect UI, responsiveness, and high-quality UX implementation.
- Implemented rich UI interactions and animations using MUI, Ant Design, Swiper, Keen Slider, and Framer Motion.

- Collaborated closely with backend engineers, designers, and QA teams to deliver features efficiently and maintain high product quality across releases.

ROMA Opticals, Dubai - *Full Stack Web Developer*

APRIL 2024 - MARCH 2025

- Rebuilt and redesigned a legacy Laravel-based e-commerce platform into a modern, scalable, and SEO-optimized architecture, improving overall performance and maintainability.
- Separated the system by introducing a dedicated Next.js frontend while maintaining backend APIs for the web, mobile app, and admin dashboard.
- Improved system stability and scalability during high-traffic seasons by implementing performance optimizations, caching strategies, and load distribution across servers.
- Integrated and stabilized multiple third-party services, including payment gateways, SMS/OTP providers, and delivery/logistics APIs to automate core business operations.

SAHMTALK, REMOTE - *Full Stack Web Developer*

JULY 2023 - MARCH 2024

- Built a full-stack social media platform for stock market discussions in the Arab world, inspired by a Twitter-like experience (profiles, posts, and social interactions).
- Developed the entire web application and backend API for both the web platform and mobile application, ensuring a unified and scalable architecture.
- Implemented real-time features including user messaging via sockets and live video streaming capabilities to support interactive user engagement.

FREELANCE - *Web Developer*

JUNE 2020 - JUNE 2023

- Rich and diverse early experience in web development while exploring modern full-stack technologies.
- Focused on building dynamic web applications using Next.js.
- Worked with React.js, Next.js, and Tailwind CSS to develop responsive user interfaces.
- Gained hands-on experience with Firebase for backend services and authentication.
- Built and integrated RESTful APIs and third-party services.
- Exposed to server management and web hosting in real-world deployments.
- Used Git and GitHub for version control and collaborative workflows.
- Delivered 17+ web development projects for clients across various industries and regions worldwide.

EDUCATION

Anna University, Chennai, India - *B.Eng: Electronics & Instrumentation Engineering*

AUGUST 2018 - APRIL 2022

Built a strong foundation in analytical thinking, problem-solving, and systems design, with exposure to programming and data-driven engineering concepts.
